

eslint-nestjs-apireponse

A simple ESLint plugin that enforces the use of `HttpStatus` enum from `@nestjs/common` in NestJS `ApiResponse` decorators.

Features

- Automatically detects numeric literals in `@ApiResponse` decorators
- Suggests replacing them with appropriate `HttpStatus` enum values
- Automatically adds `HttpStatus` import when missing
- Includes autofix functionality

Installation

```
npm install eslint-nestjs-apireponse --save-dev
```

Usage

Add the plugin to your `.eslintrc`:

```
{
  "plugins": ["nestjs-apireponse"],
  "rules": {
    "nestjs-apireponse/require-http-status": "error"
  }
}
```

Or use the recommended configuration:

```
{
  "extends": ["plugin:nestjs-apireponse/recommended"]
}
```

Examples

✗ Incorrect:

```
@ApiResponse({ status: 200, description: 'Success' })
```

✓ Correct:

```
import { HttpStatus } from '@nestjs/common';

@ApiResponse({ status: HttpStatus.OK, description: 'Success' })
```

Requirements

- Node.js >=14.0.0
- ESLint >=7.0.0
- @nestjs/common >=8.0.0
- @nestjs/swagger >=5.0.0
